

A diagram of a conventional lens, represented as a simple semi-circular shape with a flat base and a smooth, continuous curved top surface.

Lente convencional

A diagram of a Fresnel lens. The top part shows a semi-circular shape divided into horizontal layers of varying thickness, with the central layer being the thickest. Below this, a series of vertical dashed lines extend downwards to a series of small, stepped, triangular prisms on a flat surface. A single vertical dashed line in the center extends from the center of the lens to a small semi-circular prism in the center of the base.
